**About**

About Us

At Toshiba America Medical Systems (TAMS) we have adopted a philosophy that hinges on empowering our customers. Our Yes, You Can approach means, for example, that a single piece of Toshiba equipment can be used across departments and for multiple applications. And it means imaging solutions that help enhance both patient and financial outcomes through features that make imaging faster, safer and less invasive.

Through a full line of medical imaging systems, encompassing traditional X-ray, Vascular X-ray, MRI, CT, Nuclear Medicine and Ultrasound, Toshiba has become one of the world's largest manufacturers of medical imaging systems.

Beyond our high-performance imaging systems, our technological gene pool includes semiconductors, robotics, LCDs and, candidly, just about every other high-tech, breakthrough technology. And all those little bits and bytes in our laptops, DVD systems and computers wind up under the hood of our medical imaging systems.

Our medical imaging systems work the way you want them to work. Easy. Fast. Guaranteed uptime. They're designed to fit small rooms and big bodies. And when you partner with Toshiba, you get everything you need with one integrated company, including flexible, high-tech service and support and the complete financial resources of Toshiba America Medical Credit (TAMC).

Toshiba America MRI, Inc. (TAMI) is a subsidiary of TAMS, responsible for the R&D, engineering, and manufacturing of Toshiba MRI systems, including VISART, FLEXART, OPART, and EXCELART.

Can your stretch your imaging dollar, while improving patient and economic outcomes?...Yes, you can.

Thanks for stopping by. If you want to know more, we'd really like to hear from you. Call us toll-free at 1-800-421-1968, or drop us an E-mail.
